## About Boomerang Native Art

The Group Activity package is a progression from the original decorating boomerang. It allows much of the preparation and drying time to be eliminated, and the finished product to be produced in a shorter time frame.

The product that has emerged is a 34cm boomerang of traditional shape, constructed from high quality MDF timber. The boomerang is then sanded, cleaned and painted in lead-free ochre lacquer. Designs are pre-screen printed for ease of use. The timber is produced in Australia from renewable forests. The boomerang is ideal for kindergarten upwards, from basic colour application to the most sophisticated creation of intricate designs.

Boomerang Native Art produces quality boomerangs from plantation timber, suitable for painting and decorating in traditional designs and techniques, or with designs of your student's choice.
